

Building Trilinos Using CMake

Trilinos User Group Meeting

Thursday, November 8th, 2007

Timothy M. Shead (1424)

Danny Dunlavy (1415)

SAND 2007-7297 P

What is this thing you call CMake?

- **Open-source cross-platform build / test / distribution system.**
 - Win32
 - Mac OSX
 - Unix / Linux
- **Used Extensively Within Sandia**
 - VTK/Titan
 - ParaView
 - ThreatView

CMake Outside Sandia

- [KDE4](#) - the next version of the powerful Open Source desktop, application suite and development platform will be built using CMake, which together with Qt4 will make it possible to run KDE4 not only on Linux/UNIX, but also Mac OS X and Windows.

Libraries

[\[edit\]](#)

- [eXtensible Data Model and Format \(XDMF\)](#)
- [Grass roots DiCoM \(GDCM\)](#)
- [Vision-something-Libraries \(VXL\)](#)
- [Vispack](#) - C++ library developed for processing volumes images and surfaces
- [Teem](#) - libraries for representing, processing, and visualizing scientific raster data
- [BIAS](#) - The Basic Image AlgorithmS C++ Library
- [GoLib](#) - general c++ library
- [cmkSQL](#) - an abstract SQL Library
- [AtomicHF](#) - Package to solve Hartree-Fock equations for a spherical system using Numerov algorithm
- [XVT](#) - A software development environment for easily building cross-platform GUI applications in C or C++.
- [The Half-Life 2 SDK in CMake](#)
- [The after Open Source A/52 encoder](#)

Toolkits

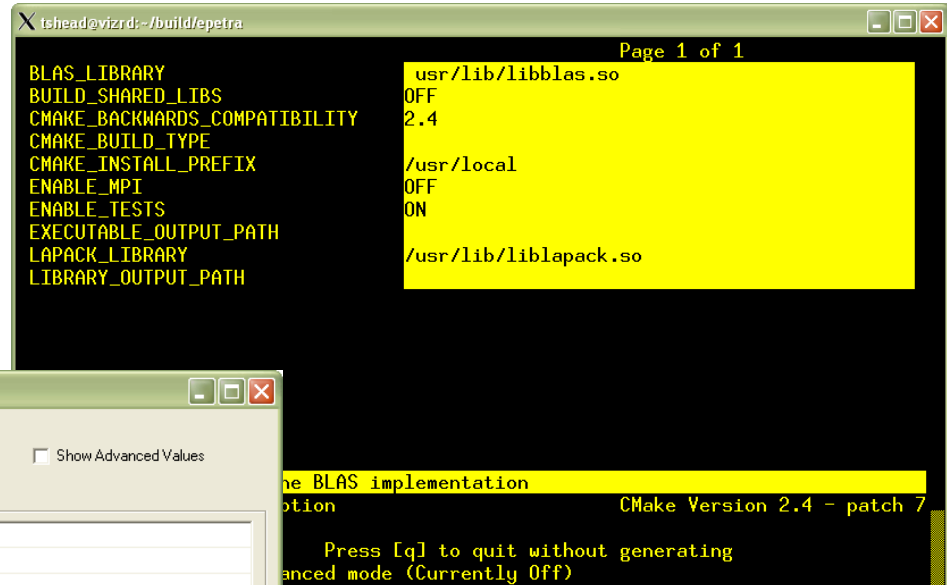

[\[edit\]](#)

- [Visualization Toolkit VTK](#)
- [Insight Segmentation and Registration Toolkit ITK](#)
- [DICOM ToolKit \(DCMTK\)](#)
- [Medical Imaging ToolKit](#)
- [MITK](#) -Medical Imaging Interaction Toolkit
- [AA+](#) - A class framework for Computational Astronomy
- [Ftk](#) - cross-platform C++ GUI toolkit for UNIX/Linux (X11), Microsoft Windows, and MacOS X
- [FInventor](#) - 3D toolkit
- [ORCA](#) - open-source framework for developing component-based robotic systems
- [KWWidgets](#) - A free, cross-platform and open-license scientific-visualization GUI Toolkit.
- [IGSTK](#) - Image Guided Surgery Toolkit

Multiple Front-Ends

- Command-line
- Curses
- Graphical (Win32)

```
tshead@vizrd:~/build/epetra
Page 1 of 1
BLAS_LIBRARY      /usr/lib/libblas.so
BUILD_SHARED_LIBS OFF
CMAKE_BACKWARDS_COMPATIBILITY 2.4
CMAKE_BUILD_TYPE
CMAKE_INSTALL_PREFIX /usr/local
ENABLE_MPI        OFF
ENABLE_TESTS      ON
EXECUTABLE_OUTPUT_PATH
LAPACK_LIBRARY    /usr/lib/liblapack.so
LIBRARY_OUTPUT_PATH
```

```
the BLAS implementation
option
CMake Version 2.4 - patch 7
Press [q] to quit without generating
anced mode (Currently Off)
```

Where is the source code: C:\src\Trilinos\packages\epetra Browse...

Where to build the binaries: C:\build\epetra Browse...

Show Advanced Values

Cache Values	
BLAS_LIBRARY	c:/build/blas_win32.lib
BUILD_SHARED_LIBS	OFF
CMAKE_BACKWARDS_COMPATIBILITY	2.4
CMAKE_INSTALL_PREFIX	C:/Program Files/epetra
ENABLE_MPI	OFF
ENABLE_TESTS	ON
EXECUTABLE_OUTPUT_PATH	
LAPACK_LIBRARY	c:/build/lapack_win32.lib
LIBRARY_OUTPUT_PATH	

Right click on a cache value for additional options (delete, ignore, and help).
Press Configure to update and display new values in red.
Press OK to generate selected build files and exit.

Configure OK Cancel Delete Cache Help

Single output directory for building all executables.

Multiple Back-Ends

- **Borland Makefiles**
- **KDevelop 3**
- **MinGW Makefiles**
- **MSYS Makefiles**
- **NMake Makefiles**
- **Unix Makefiles**
- **Visual Studio 6**
- **Visual Studio 7**
- **Visual Studio 7 .NET 2003**
- **Visual Studio 8 2005**
- **Visual Studio 8 2005 Win64**
- **Watcom WMake**
- **XCode**

Regression Testing with CTest

- Tests integrated with the build system
- Tests can be enabled/disabled based on configuration
- Tests can be submitted to a Dashboard Server
 - Nightly Builds
 - Continuous Builds
 - Experimental Builds
- Ex: **VTK Dashboard**
- Ex: **Epetra Dashboard**

Installation

- **Install target**
- **Compatible with downstream distribution**
 - **Builtin prefix support**
 - **Builtin DESTDIR support**

Binary Packaging with CPack

- **Self-extracting Tar/gzip packages (Unix)**
- **Tar/gzip packages (Unix)**
- **Tar/bzip2 packages (Unix)**
- **ZIP compressed packages (Unix / Win32)**
- **NSIS graphical installers (Win32)**
- **PackageMaker installers (Mac OSX)**
- **X11 Bundles (Mac OSX)**
- **Debian Packages (CMake 2.6.0)**
- **RPM Packages (CMake 2.6.0)**

Downloads

- **Binary**
 - Win32
 - MacOS Universal
 - Linux i386
 - SunOS Sparc
 - IRIX64 64
 - IRIX64 n32
 - HPUX 9000/785
 - AIX PowerPC
- **Source**
 - Minimum dependencies: C++ compiler
 - Optional dependencies: Curses, Qt (CMake 2.6)

Fabulous Demo Here!
